### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant Application is directed towards a novel hydraulic or pneumatic machine for use in various ranges of fluid flow. Particularly, Applicant claims a cylindrical housing containing a plurality of blades capable of tilting in the horizontal plane. Along with corresponding grooves claimed by applicant, these blades are configured to absorb more of the kinetic energy supplied by the moving fluid than similar prior art devices. US patent 4,045,148 to Morin and US patent 6,537,018 to Streetman, disclose similar machines that rely on tilting blades to extract energy from moving fluid. The prior art, however, does not suggest or disclose all of the claimed structural features in Applicant sole independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
